

3form® Varia *ecoresin*™, translucent resin panels, in select patterns, are available as vertical surface options on the Fortis Conference Room furniture. In addition to a multitude of patterns, a choice of seven face surface finishes (textures) are available. For samples please visit 3form® web site: <http://www.3-form.com/samples-standard-varia.php>

In order to prevent the interior of the furniture from being visible behind the material, the backside of all patterns will receive a supermatte finish and a white opaque backer, which may change the look from the images and samples you have seen. To simulate what the pattern would look like, you can place a supermatte finish sample and a piece of white paper behind the pattern.

### Organics

Bamboo Rings	Bear Grass Lite	Fossil Leaf	Loop	Sonoma	Thatch
