

# CUMBERLAND

Highly refined, uniquely faceted

Clover Collection Stool

*beautiful objects that work*

**Clover Collection Stool**  
*Designed by 5d Studio*

The Clover Collection Stool is light in scale, yet speaks of quality in its lines, upholstery, and materials. It shares with the rest of the collection a faceted seat, flowing from the front edge into the contours of the back. With low- and high-back options, two seat heights, and base designs ranging from a sleek stainless steel column to the residential warmth of wood, the Clover Stool can be at home in many environments. As part of a collection, Clover pieces can carry a thread of design continuity throughout a space that contains different functional environments.

The front edge of the seat's upholstery flows into the curve of the back for a cohesive design.

High and low backs assure just the right degree of comfort and ease for any environment.

**Specifications**

Available with a low or high back in counter or bar height, Clover Stools are constructed of multi-density polyurethane foam. The three base options are a solid wood 4-leg base; a tubular 4-leg stainless steel base/ and a stainless steel column, non-return swivel X-base.

**Options**

- Upholstery: COM/COL, Graded Fabric, and Elmo Leather program
- Wood Base: Maple is standard; Walnut is also available.
- Finishes: Available in any standard MP finish on Maple or any premium WL finish on Walnut; custom finishes are also available.
- Metal Base: Polished or Satin Stainless Steel is standard; Statuary Bronze is also available.
